Objet : INVITATION - Launch of the European Energy Efficiency Platform (E3P)

INVITATION TO THE LAUNCH EVENT OF

EUROPEAN ENERGY EFFICIENCY PLATFORM (E3P)

The European Commission's Joint Research Centre (JRC) along with the main policy DGs is pleased to invite you to the upcoming launch of the **European Energy Efficiency Platform (E3P)** on the **5th April 2016 in Brussels**.

Why launching the European Energy Efficiency Platform (E3P)?

Energy Efficiency is at the core of the Europe's 2030 strategy, setting up an indicative target at the EU level of at least 27% for improving energy efficiency (EE) of future energy consumption based on the current criteria European Council Conclusions, 24th October 2014 http://www.consilium.europa.eu/uedocs/cms_data/docs/pressdata/en/ec/145397.pdf

".

Therefore the European Commission, in collaboration with Member States, has to propose priority sectors in which significant energy efficiency gains can be reaped. The objective is to ensure the necessary regulatory and financial efforts are implemented to address the challenges faced by our economies in terms of jobs, growth, fairness and democratic change.

There is a recognised need to **gather, organise, analyse and distribute it in a central system** in all related energy efficiency fields. This is why the European Commission is launching the European Energy Efficiency Platform (E3P).

The E3P will be organised around the six thematic areas of energy efficiency in products, cities, buildings, transport, industry and distribution (heating, cooling and electricity). A dedicated IT based platform will be at the centre of the platform with interactive and collaborative features. The E3P will provide robust data and analysis to support those in charge of the development, implementation and monitoring of energy efficiency policy, industry, consumers' organisations, standardisation bodies, research institutes, the scientific community and NGOs at the EU, national, regional and local level.

You will find more details in the attached concept paper, which is a result of internal discussions with various Services of the European Commission, and the draft agenda of the launch event.

You are cordially invited to join us and contribute during the discussions. To register for the event, please send your name and organisation with attached scanned ID copy to: JRC-ENERGY-EFFICIENCY@ec.europa.eu

Looking forward to meeting you soon.

Kind regards

Dr. Giovanni Federigo De Santi
